Hi Jo -

FYI I am out of the office on April 22. Should be available all other days in next 2 weeks. Thx. -BC

Subject: Schedule conference call to discuss additional modeling needs for Deschutes River, Capitol Lake, and Budd Inlet TMDL

As you know, Ecology plans a phased approach for this TMDL. It is our understanding that additional modeling is required to complete the marine phase. I would like to schedule a meeting to discuss the modeling needs as well as the timing and funding for these studies.

I will send out a doodle poll with potential dates and times for this meeting. Please let me know in advance if there are specific days and times that will NOT work for you. I would like to schedule this within the next 2 weeks, if possible.

Thanks,

Jo
